District Administrators
and Classroom Teachers

Assessment Tracker Sapphire Analysis Suite

Sapphire Assessment Tracker is the preferred tool to easily access relevant student and teacher performance, measure accountability of academic standards and track performance at the district, school, class room and student level.

With Assessment Tracker school districts can substantially increase the information available to professional educators by storing and retrieving varied performance data on individual students. Assessment Tracker allows teachers to become classroom researchers by making a broad range of student data easily available to them. By storing assessments, scores, and grades over time in diverse areas such as writing, mathematics, standardized tests, attendance, discipline and other KPI, Sapphire Assessment Tracker provides a comprehensive portfolio of student progress and trends.

Moving data into Assessment Tracker could not be simpler. Utilizing the Assessment Tracker Import Wizard, data can be imported from virtually any data source that can export data to Excel, flat files, comma delimited files, tab delimited files, Excel XML format and more. The Import Wizard walks the user through moving the data into the system.

- Fully web-based solution
- Link student performance to homeroom and classlist information over multiple years.
- Link standardized and local assessments to grades.
- Compare all levels of reports to define groups within the division and to benchmarks from outside the division.
- Identify improvement areas at the division, school, grade, teacher, and student levels.
- Provide statistics which can assist administrators and teacher in making performance predictions.
- Access all functionality from a single point/page.
- Output to PDF, web format (html), Excel (xls), csv, rtf, and txt.
