

Report Writer Sapphire Analysis Suite

Adequate Yearly Progress (AYP), as part of the No Child Left Behind Act (NCLB), holds the Local Education Authorities (LEA) accountable to students, their parents, teachers, and the community. To support this accountability, school districts need to be able to track a large variety of data, determine trends, identify anomalies, denote strengths and uncover weaknesses. And all this needs to be done quickly, easily, and on multiple levels within the school district.

Sapphire Report Writer provides comprehensive, easy to use, interactive tools to create and customize reports to streamline and automate the reporting process within the Sapphire Suite of products. The reporting engine offers the full flexibility to customize reports, providing the opportunity to pick and choose from a wide variety of data fields, sort sequences, and numerous choices of print formats.

Part of the Sapphire Analysis Suite, Report Writer substantially increases the information available to professional educators, from Superintendents to Administrators to Teachers. Quick and easy access to all necessary data and information allowing professionals to spot trends, identify strengths and weaknesses, and forecast results all faster and more comprehensively than ever before.

Fully Web-Based Technology

Platform Independent
(Windows, MAC and Linux)

Real Time Integration

Intuitive and Friendly
Web Interfaces

Comprehensive Reporting
and Analysis Capabilities

Highly Flexible & Scalable
Web-Based Architecture

Designed by and for
District Administrators
and Classroom Teachers

- Fully web-based solution.
- Easy to use, interactive custom report creation.
- Drag and drop data fields to include in a report.
- Save and publish ad-hoc queries, user developed reports, and custom report options.
- Choose report destination: Send it to a printer or save the output for later uses such as emailing.
- Export results of ad-hoc queries and standard reports for import into other packages.
- Modify pre-existing templates to use the same report for many different purposes
- Output reports in many formats including PDF, web format (html), Excel (xls), csv, rtf, and txt.
- Compare all levels of reports to define groups within the division and to benchmarks from outside the division.
- Create longitudinal reports at the district, school, grade, teachers, and student levels.
